Resolved Issues: **Communication issue with PCS250**
We have discovered a communication issue between the panels and the PCS250 that could cause the PCS250 to lose connection to the cell phone network. This can also present itself as the VDMP3 being displayed as missing in the Trouble list.

Network connectivity (PCS250 only)
On certain networks the PCS250 was having issues with connecting to the mobile network, both during initial setup and if the network was lost.
